## New Jersey copper research

Dear Roger:

Since you telephoned me about a week ago about furnishing you with research material for your forthcoming opus on New Jerseys I have been thinking as to how to help you now rather than postpone all the work until a visit from you in the fall.

You said you had an invoice from Johnson to Boyd with a large group of New Jersey pieces. If you can send me a copy I can have my secretary in St. Louis look through Johnson's invoices now which I believe I have for 1940 through 1947 and it should disclose which coins may be Green coins and which may have come from Armin Brand's portion of Virgil Brand's estate holdings. Then I would have no objection to having sent to you a photocopy of the New Jersey coins in Mehl's list of the Newcomer collection to check that matter. I may have withdrawn some New Jersey pieces from the Green collection which may have come from Newcomer or from other Green sources or may be from other prior acquisitions of mine. Some of that would have to wait until I get home as they are in a vault at some bank. I also might have a list including my earlier acquired New Jersey pieces in the vault but do not know.

You were going to try to figure out where I received the photo negatives and positives of superb examples of New Jerseys including virtually all the rare varieties. I have had these for approximately 50 years or more, They are in little clear envelopes. but without marking as to the photographer or source. These can wait until you see them but maybe you have an idea now.

Have a great time at the ANA Convention.

Eric

Hi Everyone,

First, many many thanks for all the information and time you have each provided me in completing this Chapter of the New Jersey Copper Book on "Collectors and Their Collections". I must say that when I started this Chapter I thought it would be about 10 pages long and and take two weeks to complete. In general, I was off by a factor of four!

Also, it was interesting to navigate through the many catalogs, archives, write-ups, and recollections and make them all hang together. But I did my best.

So if I can impose upon all of you one more time to take a look at the "near FINAL" draft of the Chapter for any comments, it would be greatly appreciated. I also recognize that several of you played key roles in the evolution of New Jersey Copper collecting and I hope I appropriately covered the high lights as you conveyed them to me.

I look forward to any comments you may have.

Best and Thank You Again,

Roger S. Siboni

I don't get to write that too often!

And many more.

Roger Siboni

Eric,

I just looked at my Vlack Plate and it's copyrighted 1974. So the questions remains, when was the last obverse discovered?

Best,

Roger

Hi Eric,

Do you happen to recall what year Bob Vlack first produced his Machin's Mills photographic plate?

Also, do you recall the last time a new obverse was discovered?

I attach for your consideration a newly discovered 25-87C (for the moment) that just appeared on eBay. I am writing an article about it for CNL/C-4 Newsletter. Also, the New Jersey Copper book is finally (after more than a decade) finished and in editorial review as I type.

Best,

ROger
